2009 Customer Initiatives

Beginning in 2009, ACSI has taken the initiative to actively promote our customers as well as our services. Giving companies the opportunity to learn ideas and strategies for energy and cost savings can be very helpful especially in today's climate.

We recently asked the Editor of the Chief Engineer Association of Chicago's magazine if they would be interested in writing a case study on Hinsdale Hospital.

We believe Hinsdale Hospital has a great story to tell on their approach to saving energy, efficiency and money. Cindy Gallagher, Editor for Chief Engineer Association of Chicago made a trip out to their facility and was impressed with their approach and savings. To give you a little preview, they were able to save even more energy than originally projected. ACSI projected a 6.2% energy savings with new fuel burning equipment and they've realized in excess of 9% savings.

Wonder how they were able to accomplish it? ***You'll have to read it in the February issue of Chief Engineer Association of Chicago magazine.***

ACSI is also expanding our presence in the marketplace. We continue to actively promote our services so we can to grow and share our knowledge with new customers. If you know someone who needs our services, refer us. When they become a new customer of ACSI, we would like to thank you for your time and effort by presenting you with a Tom Tom GPS.

If you'd like to be considered for a future article or case study, let us know.

Green Mechanical Certified

Does a fast ROI Interest you?

What if you could save energy and bottom line costs?

ACSI Can Prove to You How.
